## PE1865/DDDD - Suspend all surgical mesh and fixation devices

I lost a dear, wonderful woman and friend who died of cancer but couldn't be helped.

I saw and heard of her struggles with her mesh implant and had to witness her living in pain for all the time I had the honour to know her.

I'm not sure if this is the proper way to show my support for this petition but please try and look at everyone's case and concerns to try and follow some new rules for this practice. Even if it stops one person going through what I saw my friend having to suffer it's a good cause.
