

PE2138/B: Make publicly owned buildings accessible for people with colour blindness

Petitioner written submission, 5 June 2025

The reason for the petition has been the difficulty experienced by me and other colour blind people in dealing with a world in which information is often provided in a colour coded way. This can involve situations such as toilet doors in which red and green are used to indicate whether or not a cubicle is in use, graphs and maps which use colours. Often simple adjustments can easily remedy this situation. By accepting this petition, I hope that the Scottish Government can be persuaded to set an example that outside bodies would be encouraged to follow.
