Motions

Motions and amendments are usually printed the day after lodging. When an amendment is lodged, then the original motion will be republished alongside it.

Motions and amendments can be published with symbols:

- *** before the number indicates publication for the first time
- *...*** around a section of text indicates changes to previously published material
- R** indicates a member has declared a registered interest

The Parliamentary Bureau periodically deletes motions or amendments that are over six weeks old and not scheduled for debate.

Questions regarding this section should be directed to the Chamber Desk.

Members' Business motions that have not achieved cross party support

***[S6M-16644](#) Daniel Johnson: Learning Disability, Autism and Neurodivergence Bill** —That the Parliament notes its disappointment at reports that the promised Learning Disability, Autism and Neurodivergence Bill was not announced in the most recent Programme for Government; believes that people with learning disabilities, autism and neurodivergence in Lothian and across Scotland are structurally excluded and disadvantaged, and that it is harder for them to achieve their potential than people who are neurotypical; considers that the measures included in the draft Bill, such as creating and upholding statutory rights, improving access to mental health services and tailoring education provision, would break down some of the barriers faced by people with learning disabilities, autism or neurodivergence, given that a reported 37% of schoolchildren reportedly have additional support needs but that only 6% of teachers are trained to provide these, and notes the calls on the Scottish Government to provide clarity on its commitment to legislating in this area.

***[S6M-16631](#) Emma Harper: Brain Tumour Awareness Month 2025**—That the Parliament recognises that March 2025 is Brain Tumour Awareness Month; understands that brain tumours remain the biggest cancer killer of children and adults under 40; recognises that data in Scotland shows that 70% of diagnoses of brain cancer take place in an emergency setting; acknowledges that people affected by brain cancer are the most likely of all cancer patients to be diagnosed during an emergency admission to a hospital; understands that there are over 120 different types of brain tumour; further understands the benefits and need for achieving a faster diagnosis for those affected, which includes potentially reducing the number of initial surgeries that are conducted as emergency procedures and providing potentially more opportunities to participate in research; commends the efforts of the Brain Tumour Charity and its Scottish Steering Committee in working towards achieving a faster, better diagnosis for those affected by raising awareness of the disease, seeking to improve diagnostic pathways and establishing diagnostic/triage tools once available, and notes that those impacted by a brain tumour can reach out to the Brain Tumour Charity and access a variety of support services.
